Cordek – Arboricultural Site Supervision Log

Project / Site Address: Cordek, Spring Copse Business Park, Stane Street, Slinfold, RH13 0SZ

Supervisor: Max Ferretti [Arboricultural Consultant]

Scope: Arboricultural monitoring in accordance with BS5837:2012

Arboricultural Monitoring Visit

Date: 14/09/26

Activity: Arboricultural monitoring of hand-dug trench works within a root protection area (RPA)

Time on site: 09:00–16:00 **(7 hrs)**

Notes: I was instructed by Stephen Hearn to carry out arboricultural monitoring of a hand-dug section of ground required for a lighting cable run passing through the RPA. The trench was approximately 400 mm wide by 400 mm deep and was carefully excavated under my supervision to avoid disturbing the wider RPA, in accordance with BS 5837:2012. No roots were encountered or impacted during the excavation.

Photograph taken near completion of the excavation.
