Categories: Comments Received

Dear Alice

Many thanks for your visit to our property last Friday, we very much appreciated it. Just to confirm we still have a couple of concerns regarding the proposed change of car parking at Collyers.

1. I am still very concerned as to the proposed boundary which will run paralel to our back gardens. I am concerned as to what trees/bushes will be planted as at the moment the trees that are already established grow significantly blocking out the view but also the light and sunshine. We have a garden which has the sun most of the day and evening and I am concerned more trees planted there will block this out. Any further trees would need annual management/triming.
2. I am also very concerned about the flooding which lays outside our boundary and extends into Collyers field. This was can lay for several weeks before it dries up. I am not sure how erecting buildings will affect this sever flooding.
3. My other concern is the entrance/exit to Collyers. This will need to be extended and will this affect the parking bays which are on Hurst Road. As you are aware the surrounding car parking is already very congested and if any of the bays are taken away this will have an impact on the available car parking, possibly causing further danger to cars and people.

Please could you lodge my concerns

Thanks

Subject: DC/26/1089 - Proposed change of car parking at Collyers college, Hurst Road, Horsham

Dear Planning Team

I live at no 3 Hurst Avenue, Horsham, RH12 2EL and my garden backs onto Collyers College. I am concerned as to how close the car parking boundary is going to be and how close this is going to be to our boundary. I have taken a look at the plans but as these are so small I am unable to make out the finer details. Please could someone explain to me further how close to our property this is going to be and how the trees/shrubs are going to be placed.

Also I am concerned as to how the entry/exit to collyers is going to be placed. I expect the existing exit is going to be widened but I would be grateful again for further explanation. There are several car parking spots on Hurst Avenue and wondered if this proposed change to the entry/exit will be taking up any of these spaces.

I would be very grateful if a person could come and visit the site with me so that I can see how this is actually going to change and affect our outlook.

I look forward to hearing from you
