

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

1. Submission details

1.1 Date

For example, 3/11/2023

13/03/2026

1.2 Planning application reference number

DC/25/1033

1.3 Local planning authority (LPA)

Horsham District Council

1.4 Development site address

If the site does not have an address, enter the OS grid reference.

Ranfold Barn, Five Oaks Road, Slinfold, West Sussex, RH13
0RL

1.5 Describe the development

Tell us about the proposed development and any changes of use (250 words).

Erection of a new stables block comprising of six stables, a hay barn, tack room, feed room and machinery store. Construction of a sand school.

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

☒ Yes

☐ No

4.2 If no, what earlier date did you agree with the LPA?

N/A

4.3 How have you met the guidance on 'what counts towards your BNG'?

[Find out what you can count towards a development's BNG](#)

The guidance on what counts towards BNG has been met for this scheme. The scheme will use on-site habitat retention and creation to contribute to achieving a 10% gain in the baseline biodiversity value of the site. The BNG will not be delivered through any other schemes.

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

No irreplaceable habitats are located within the development boundary. A native hedgerow that is reasonably likely to fit the criteria for a HPI is located within the development boundary. However, this hedgerow will be retained in its entirety and is located at sufficient distance from the main footprint of the development.

The BNG hierarchy principles of avoiding habitat loss, enhancing baseline habitat or compensating through the creation of new habitat has been applied to the design of the development.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☐ Yes

☒ No

4.6 How will you achieve the target net gain percentage?

☒ On-site

☐ Off-site

☐ Both

4.7 Are any of your on-site enhancements considered 'significant'?

[Find out what counts as a significant on-site enhancement.](#)

☒ Yes

☐ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

Significant onsite enhancements include the creation of traditional orchards, other neutral grassland and a native hedgerow.

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

N/A

4.10 Explain why you're using off-site biodiversity units

Only answer this question if you're planning to use off-site biodiversity units (250 words).

N/A

4.11 Explain why you're planning to use statutory biodiversity credits

Only answer this question if you're planning to use statutory biodiversity credits (250 words).

Statutory biodiversity credits are not required for this development.

4.12 Do you have a habitat management and monitoring plan?

- ☒ Yes
☐ No

4.13 Have you used the statutory biodiversity metric tool?
