To whom it may concern.

I have been a home owner at Bluecoat Pond, Christ's Hospital for the past 13 years and have seen a few changes to the area in that time, not all to the residents advantage.

I'm emailing to protest the new proposal of yet another car park by the station known as the Warren.

I'm one of many residents anti this going ahead which I'll list below.

1. There is poor access as a single track road with no scope to widen that floods regularly.
2. There would be a loss of beautiful and irreplaceable countryside.
3. There would be a loss of amenity to local residents.
4. There would be increased noise, pollution, disturbance and crime to local residents.
5. There would be a loss of privacy for local residents.
6. The current car parks have a 35% average occupancy with the busiest days(Monday-Thursday) averaging 51%. Commuter traffic park on approaching roads leading to the station on the verge to avoid paying the car park fee.

So tell us why we need another car park?!!!

Regards
