

# Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

## When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

## 1. Submission details

### 1.1 Date

For example, 3/11/2023

13/04/2026

### 1.2 Planning application reference number

DC/25/0446

### 1.3 Local planning authority (LPA)

Horsham District Council (HDC)

### 1.4 Development site address

If the site does not have an address, enter the OS grid reference.

High Barn, Crays Lane, Goose Green, West Sussex,  
RH20 2LR

### 1.5 Describe the development

Tell us about the proposed development and any changes of use (250 words).

The development proposals include the demolition of the existing barn building and the construction of one garage, three residential dwelling units each with their associated garden plot and parking area.

## 2. Developer details

### 2.1 Applicant name

Stuart Jolliff

## 2.2 Company name

Jolliff Homes

## 2.3 Address

Woodlands Worthing Road HORSHAM, West Sussex

## 4. Biodiversity net gain strategy

**4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?**

- ☐ Yes  
☒ No

**4.2 If no, what earlier date did you agree with the LPA?**

12/03/2025

**4.3 How have you met the guidance on 'what counts towards your BNG'?**

[Find out what you can count towards a development's BNG](#)

The guidance on what counts towards BNG has been met for this scheme. The scheme will use on-site habitat retention and on-site habitat creation to achieve the mandatory minimum 10% biodiversity net gain requirement for Horsham District Council.

The BNG will not be delivered through any other schemes.

**4.4 How will you avoid or minimise impacts to habitats?**

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

No irreplaceable habitats were recorded within the development boundary or will be adversely impacted as part of the development.

The BNG hierarchy principles of avoiding habitat loss, enhancing baseline habitat or compensating through the creation of new on-site habitat has been applied to the design of the development.

**4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?**

This includes other specified strategies if you do not have a local nature recovery strategy.

- ☒ Yes

☐ No

**4.6 How will you achieve the target net gain percentage?**

☒ On-site

☐ Off-site

☐ Both

**4.7 Are any of your on-site enhancements considered 'significant'?**

[Find out what counts as a significant on-site enhancement.](#)

☒ Yes

☐ No

**4.8 If yes, tell us about the significant on-site enhancements**

Include the appropriate planning condition or how you've secured the habitat.

The on-site enhancements involve implementing new native species-rich planting, planting of native tree species, adoption of bat and bird boxes.

However, no habitats of High or Very High Distinctiveness are proposed to be created or enhanced. The resulting on-site net gain equates to +0.05 habitat units. In accordance with HDC's guidance, these gains are not considered 'significant' and fall below the 0.5-unit threshold for securing biodiversity net gain through a Section 106 agreement.

**4.9 How many off-site biodiversity units do you need to meet 10% net gain?**

N/A

**4.10 Explain why you're using off-site biodiversity units**

Only answer this question if you're planning to use off-site biodiversity units (250 words).

N/A

**4.11 Explain why you're planning to use statutory biodiversity credits**

Only answer this question if you're planning to use statutory biodiversity credits (250 words).
