Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Privacy Light and Noise
Comments:	I flagged this window to HDC in February as it was not on the original building plans, which has resulted in this planning application being submitted, otherwise I doubt anything would have happened. This window is a significant change to the original plans which IMPACTS OUR PRIVACY much more than the creation of first floor windows from the original bungalow. I did not object to the original 2022 planning application. The extra height of this second-floor window impacts on all areas of our property both inside and outside, and some garden areas which were "private" are now overlooked. These are in both our

front and rear garden.

I have three photographs to support this but cannot figure out how to submit as part of this objection.

Whilst I believe there has been a serious lack of professionalism in both the architect's initial submission, and the building contractor purchasing and fitting an extra window (not on the plan). High quality professionals would fully understand planning procedures and not try to sneak such a change to agreed specifications.

I can understand the need for light in the roof space.

I doubt very much that the application will be rejected and the window removed so I offer an acceptable solution whereby the window has two conditions;

1. It should not be openable.

2. It should contain opaque or patterned glazing preventing clear visual view to the outside but still allowing light into the roof space.

Finally, I believe there is an error in the Application Form concerning whether the site can be seen from a public road. The window can be seen from Mead Lane.

Kind regards
