PLANNING ASSESSMENT

The main consideration of this application is whether the proposed alterations can be considered as non-material amendments to the approved scheme in accordance with Section 96A of the Town and Country Planning Act 1990 (as inserted by S190 of the Planning Act 2008). The discretion rests with the Council to decide to whether the revisions would constitute a non-material amendment to a planning permission, which would not take it outside the scope of the original permission.

The proposed amendments relate to the reduction of new wall to the side of existing boundary and reduce the roof area by altering the barn hip on the rear of the proposed garage roof. It is considered that the proposed revisions would not materially impact on the approved design. The amendments would not change the scale or siting of the approved development and would not create further impacts on the appearance of the building or sider surroundings. The proposal would not create any additional views of neighbouring properties beyond those identified as part of the original planning permission. Not other material impacts have been identified and the proposed amendments are there considered non-material under Section 96A of the Town and Country Planning Act 1990.
