Comments:	Public Safety
-----------	---------------

The details added by the applicant fail to address the fact that site is unsafe for the intended use, given the height / condition of the fences.

The site does not comply with NPPF paragraph 102a and the application does not propose to make it so. The application must therefore be refused, bearing in mind that the application must be treated as a permanent change of use.

The applicant raises safety issues presented by trespassers. This simply serves to highlight that the site is insecure. They reinforce the case to refuse the application.

Kind regards
