

An architectural elevation drawing of a two-story house. The house features horizontal siding and a gabled roof. The front facade includes a central entrance with a small gabled porch supported by two columns. To the left of the entrance is a large window with a decorative pediment, and to the right is a double garage door. The second story has four double-hung windows. A small dormer window is located in the gable. The drawing is a black and white line art illustration.

This is a black and white architectural elevation drawing of a two-story house. The house features horizontal siding on both levels. The roof is gabled, with the left side of the image showing the underside of the roofline. On the first floor, there is a central entrance door with a small, simple porch supported by two columns. To the left of the door is a window with a small decorative box below it. To the right of the door is a large bay window with four panes. On the second floor, there are three windows: a double-hung window on the left, a single-hung window in the center, and another single-hung window on the right. The drawing uses clean lines and hatching for shading.

This is a black and white architectural elevation drawing of a two-story house. The house features a gabled roof with horizontal siding. The main body of the house has horizontal siding, while the roof and a small addition on the left have vertical siding. The first floor has a central double door with transoms and a single door on the left. The second floor has four double windows. The roofline is gabled, and there is a small dormer or addition on the left side.

This is a technical architectural cross-section drawing of a building. The main structure on the left features a steep gabled roof with a wide overhang. The roof is shown with a double line, indicating a thick structure. The interior of the main house is empty, while the space above the roofline is filled with horizontal hatching. To the right, there is a smaller, lower structure with a similar gabled roof, also showing a double line for the roof structure. The interior of this smaller structure is also empty. The background behind the smaller structure is filled with horizontal hatching. On the far left, a portion of another structure is visible, showing a wall and a roof edge. The entire drawing is rendered in black lines on a white background, with hatching used to represent different materials or sections.
