Due to the wording of the condition, it is my view that details relating to the water tanks would not address the condition, and could not therefore be submitted as a DISC application.

Rather, a Variation of Condition would be required. The relevant information could be submitted in support of this, and the condition worded so that the development is carried out in accordance with the approved water storage facilities. While it is noted that the underground water tanks were approved under the NMA, the tanks were not secured by condition for the purpose of fire safety. The variation of the condition would secure the water tanks for the purpose of fire safety and would negate the requirement to install a fire hydrant as required by the condition.
