Subject: Installation of air source heat pump Ref. DC/24/0661

Categories: Comments Received

Ref DC/24 /0661

Dear Ms E Parkes

I wish to comment on the installation of an air source heat pump on the property Millside, Mill Road, Steyning, BN44 3LN.

The proposed positioning of heat pump will be less than 1 metre from our boundary and 3.9 metres from a downstairs bedroom of our property. The noise of constantly running fans(we understand two will be installed) would be to our detriment. Our property is in a low noise position so any decibel level above the existing very low level would be bound to create a disturbance to us.

We question that the installation can only be installed in the proposed position, and does it meet all the planning requirements? Could not the pump be moved to a more agreeable suitable site further away from our boundary?

We would be grateful to hear your thoughts on this planning application.

Yours faithfully
