

Dear Sophie,

Environmental Health have reviewed the LEAP Environmental Verification of Remediation report, dated 05.06.26, and the email from LEAP also dated 05.06.26 (with attached information) and we are satisfied that condition 29 of approved application DC/21/2697 can be part discharged in so far that it can be discharged for the northern part of the site.

We can't however fully discharge condition 29 until we have received a verification report for the remaining parts of the site.

Kind regards

Kevin

Kevin Beer
