

Dear Sophie

I have been looking through the documents for this application, I can't seem to find anything relating to access.

The bin-store requirements and plan look good.....it's just I have concerns as to how we will get a refuse vehicle to it?

If all the parking bays are occupied, I don't see how we can turn the truck around once in the carpark.

And with the bike shelter on the corner, it looks as though it would be very tight to reverse in.

Please advise.

Many thanks

**Josh Ives**
