Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including any change of use

The proposed development seeks to replace a number of existing stable buildings, which are in a poor state of repair and condition, with a single, consolidated barn structure. The existing buildings currently occupy a larger combined footprint and present a fragmented and somewhat untidy appearance across the site.

The proposed American barn has been carefully designed to:

Consolidate the existing equestrian facilities into a more efficient and functional layout

Reduce the overall built footprint on the site

Improve the visual appearance and organisation of the yard

Support the ongoing operation of the established equestrian business at Furze Field Farm

The use of the site will remain unchanged, with the barn continuing to serve the existing equestrian enterprise. The number of horses to be accommodated will be [insert – equal to existing / specify if known], and no intensification of use is proposed.

The siting of the proposed barn has been selected to sit comfortably within the existing developed area of the yard, minimising visual impact on the surrounding countryside. The scale and design reflect a typical agricultural/equestrian building appropriate to the rural setting.

Has the work or change of use already started?

Biodiversity and Geological Conservation

Is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

a) Protected and priority species

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

b) Designated sites, important habitats or other biodiversity features

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

c) Features of geological conservation importance

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

In accordance with the Environment Act 2021 and emerging local policy requirements, opportunities to deliver biodiversity enhancements have been considered. Given the site comprises existing hardstanding and buildings of negligible ecological value, the baseline biodiversity value is very low. As such, the proposed development is not expected to result in any measurable biodiversity loss. Notwithstanding this, the development provides an opportunity to deliver small-scale biodiversity enhancements, which may include: Installation of bee bricks within the new building Creation of log or brash piles within the wider landholding Provision of habitat features for small mammals, such as hedgehog refuges Sensitive landscaping within the wider site, where appropriate

Note: Please read the help text for further information why developments may be exempt or not in scope.

Replace existing stables with American Barn type structure:

The pre-application documents state that the proposal to replace the existing stables is to improve the functionality and appearance of the equestrian facility. The proposed replacement barn would retain the equestrian use on the site. The proposed American Barn structure would consolidate the 5 existing stable buildings which currently occupy 250sqm. The proposed barn would be 180sqm and would allow a neater layout for the site. More information would be required on the number of horses to be stabled within the barn and whether this would be equal to, or more than the current amount, due to the requirement for demonstrating water neutrality. Further information would also be required on the materials proposed. Overall, it is considered that the replacement of the existing stables with one American Barn type structure would allow for a neater site layout and appearance.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
