| Comments:            | I object to the proposed change from rubber infill to sand as I feel this proposed change will be detrimental to both the facility and neighbouring properties. The sand infill will provide less sound insulation and allow a higher level of noise to pollute our beautiful park and neighbouring properties. I also believe it is less suitable for the proposed use of the facility. Has consideration also been given to the longevity of the sand infill? Will it last as long as the |

rubber infill. If not then villagers will be saddled with future repair costs.

---

Kind regards
