Reasons for comment:	- Highway Access and Parking - Other
Comments:	Sorry my previous comment was send before I'd finished please let me continue. The extra 200 + vehicles that this development will bring on a daily basis will add to the already busy access road that at times is hard enough to use when cars are parked on it and the effect the extra traffic will have on the junction with the London road. You may also consider the higher risk these vehicles will bring for the many parents and children who walk along this road to school twice a day aswell as the villagers walking their dogs along the road. You may also wish to consider the higher level of pollution this will bring throughout the village. 2. The local primary schools and secondary schools are already way over subscribed, this development will only add to the current almost impossible situation of getting local children in there local/village school. 3. With the very large development that is ongoing in neighbouring Thakeham the local Doctors and Dentists do not have enough space to accommodate even more patients that this

development will bring .

4. How can this pass the current water stress tests the council require as it will clearly use more water than it does now when it is built!? Plus the general infrastructure of drainage and other amenities is inadequate currently within the village.

5. the extra light pollution this will bring to the village and the fact it borders a nation park I find unacceptable

Please consider these points along with my previous comment that sent prematurely.
