Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Highway Access and Parking - Loss of General Amenity - Overdevelopment - Trees and Landscaping
Comments:	Southern Water's systems are not able to cope with current demand, and they are planning on adding additional sewage to an

already overloaded system. This is already an environmental and public infrastructure disaster.

There are many contributing factors as to why this location is wrong for this plan. The potential environmental damage is merely the most pressing and HDC should refuse the application or delay any decision until a full investigation into Southern Water's proposal has been completed and additional capacity added to the network.

Kind regards
