26 Sycamore Rise
Barns Green
Horsham
West Sussex
RH13 0AU

As a member of the public and resident of the Barns Green community I wish to object to the proposal from Miller Homes to build on the land opposite the Queens Head pub.

The services in the village simply cannot cope with the additional pressure that the houses will create. There is limited bus routes as it is, and the roads were never designed to cope with the volume of traffic that we currently see, let alone the extra traffic from these additional. Access to the proposed new development will also create safety issues from Chaprl Road - with the number of accidents more likely to rise.

The drainage network is also at full capacity. The additional houses would create sewage issues as well as contribute to further flooding in the village.

Removal of the ancient hedgerow will disturb important wildlife and reduce habitats and biodiversity.

The recent development of Sumners Firldd has already heightened these issues and this proposal will only make matters worse.

Please reject the proposal for the sake of our village community.

Kind regards,
