

[REDACTED]

---

Dear Sir / Madam,

I have copied in those that have been involved the whole way through this process with mine and other residents objections.

[REDACTED]

The Officer's Report dated 7 July. One glaring erroneous statement in the services section states that as there are adequate services available on site for 6 units, particularly mentioning that this would be so as there is an existing house on the site.

In fact, there is no electricity connected to the vineyard site. There was a electricity connection to the the house, [REDACTED] which was only powerful enough for the needs of that one dwelling. It comes from the mini sub-station at a local house, I believe that it being used for the small development.

In order to provide adequate electricity supply to the vineyard, a connection would have to be made from the transformer situated in the estate on the opposite side of the A29. The estimate cost is upwards of £75K.

On top of that I see massive issues with sewage disposal and the rain run off scheme.

[REDACTED]

I would urge that this is rejected again it is not a site suitable for this scheme.

Regards,

[REDACTED]
