1.0 INTRODUCTION 3

1.0 INTRODUCTION

1.1 Steyping Cricket Club commissioned The Ecology Partnership to produce a Habitat Management and Monitoring Plan (HMMP) for the proposed development at Steyping Cricket Club, Charlton Street, Steyping, West Sussex, BN44 3LE, hereafter referred to as the 'site'. The HMMP is based on the Biodiversity Net Gain assessment completed in May 2026, and the habitat creation is detailed in Figure 1.

1.2 **The proposed on-site habitat creation does not include habitats of medium distinctiveness, and therefore a HMMP is not required.**

Figure 1: BNG Habitat Creation.

1.3 To achieve a +10% biodiversity net gain and satisfy the trading summary, the following additional units will need to be purchased from an offsite biodiversity provider:

- 0.02 units of individual trees, and
- 0.07 units of any habitat.
