

Dear Sir/Madam

Sorry for the delay getting this information back to you, the client was away on holiday.

T1 Oak (current dimensions)

Height 18 metres (from ground)
Canopy width 12 metres

T1 proposed works

Reduce height by 2 metres (finished height will be 16 metres)
Reduce lateral branches
NORTH by 2 metres (finished width will be 10 metres)
EAST by 2 metres (finished width will be 10 metres)
SOUTH by 2 metres (finished width will be 10 metres)
WEST by 2 metres (finished width will be 10 metres)

Work requested as the tree is causing excessive shading and high volume of leaf drop. An appropriate reduction in canopy size will allow the tree to be maintained at a suitable size for its environment and proximity to neighbouring buildings

T2 Oak (current dimensions)

Height 18 metres (from ground)
Canopy width 10 metres

T2 proposed works

Reduce height by 2 metres (finished height will be 16 metres)
Reduce lateral branches
NORTH by 2 metres (finished width will be 8 metres)
EAST by 2 metres (finished width will be 8 metres)
SOUTH by 2 metres (finished width will be 8 metres)
WEST by 2 metres (finished width will be 8 metres)

Work requested as the tree is causing excessive shading and high volume of leaf drop. An appropriate reduction in canopy size will allow the tree to be maintained at a suitable size for its environment and proximity to neighbouring buildings
