Condition(s) - Variation/Removal

Please state why you wish the condition(s) to be removed or changed

The original design of the garage required excavating the floor to install insulation and a screed finish, so it would be flush with the existing bungalow's floor level. Due to costs and the amount of work to remove rubble from the site, it was decided that the garage floor would be retained and insulation added above, with steps up from the existing bungalow floor. In this instance, it would also be better for the environment to retain the existing garage floor. This has a knock-on effect on ceiling height and the roof structure, which will become quite complicated with cranked steel beams, posts, and pad foundations to support a vaulted ceiling.

If you wish the existing condition to be changed, please state how you wish the condition to be varied

The approved extension at the rear of the garage will not be completed, the eaves height will not change from the existing eaves level on the current garage, which is higher than the bungalow eaves, and the front and rear hipped ends over the original garage are to be gabled to match the rest of the bungalow.
