

Works to a leaning Willow at Church View, the Street, Thakeham RH20 3EP

We have a healthy willow on the bank leading up the dul-de-sac for the Street, which is leaning precariously over the road. There is evidence of the roots lifting.

We are proposing that we cut the trunk back to approximately 2ft from the base. leaving the new shoots so that the trees grows back more upright.

We believe the tree is imminent danger of falling onto the roadway.

Thanks and kind regards
