Comments:	This very large tree is clearly totally dead and a danger to surrounding properties. I am worried that a strong wind will cause large branches to fly off and knock my shed or even damage the roof of my house. Since I imagine the roots may be rotting, a major storm could cause the whole tree to fall which may easily fall onto my garage, shed or house causing major damage as it is so large. Please approve this work as soon as possible before the winter storms arrive.

Kind regards
