All waste goes to approved waste carriers.

Birds and bones are picked up by Gibbs waste. 8-wheeler lorry or smaller if only a few bins. After 7am.

Bird waste is put into 240 litre bins with lids and kept in the chiller until they are picked up.

Pick up is usual on a Monday morning, when the bins will be put outside at the far end of the barn. After they have been sprayed with Steriquat 816 which stops the flies. Steriquat is also a disinfectant and sanitiser which is used on landfill sites to control any odours. The smell, if any would be no worse than a dustcart.

Fur and guts are picked up by Harry Hawkins. 4x4 and trailer. After 7am.

Fur and Gut waste is put in a 1100 bin with lid supplied by Harry Hawkins and is kept at the end of the barn in a contained area. This bin is picked up twice a week throughout the season, usually Monday and Thursdays. This bin is also sprayed with Steriquat 816 for the same reason as above.

All general waste is picked up by Horsham District Council on a Friday morning.
