Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Yes

Does your Local Planning Authority require applicants for self-build and custom-build development to evidence their eligibility?:

Yes

Please justify the reason why biodiversity net gain does not apply:

This is a self build proposal by existing Horsham residents as their long term home. The proposals have been designed by the applicants and they intend to project manage the build.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Details of the pre-application advice received

The advice concluded that , subject to an appropriate planning application, there is scope for the application as proposed. It noted that the site did not have constraints such as being in the conservation area or being a listed building and also considered the siting of the proposed buildings and scale to be appropriate given the large plot and relationship with the surrounding neighbours.

- (a) a member of staff

It is an important principle of decision-making that the process is open and transparent.
