- BALANCE BLOCKS
- TIMBER BENCH
- TIMBER BRIDGE
- SLIDE (set on slope)
- TYRE TRAINER
- CHIN UP BARS
- WOOD FIBRE SURFACE / BARK MULCH

Existing trees/ hedgerow to boundaries reinforced with native tree and shrub planting.

Native woodland mix consists of tree and shrub species with larger standard trees to increase initial impact.

Areas of native shrub mix provide a 'scalped edge' to the woodland buffer with a woodland edge/ hedgerow wildflower grassland strip bordering and transitioning to a wildflower meadow with species content to reflect the soil type and shade levels.
