Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Horsham District Council planning decisions with regard to potential ecological impacts from development. Any additional information, queries or comments on this advice that the applicant or other interested parties may have, must be directed to the Planning Officer who will seek further advice from us where appropriate and necessary.

Application: **DC/24/1745**
Location: **The Pools Shoreham Road Henfield West Sussex BN5 9SE**
Proposal: **Installation of a Solar Photovoltaic (PV) array to the southern edge of the site.**

Dear Marie

Thank you for re-consulting Place Services on the above application.

a) No ecological harm/No objection	
b) Requires further information	
c) Recommend grant permission subject to conditions	Yes
d) Recommend refusal	
e) Subject to Natural England's formal comments on the conclusion of the Water Neutrality Appropriate Assessment	Yes
f) Discharge of condition	

Please note that following receipt of Natural England's position statement on developments in the Sussex North Water Supply Zone, decisions on planning applications should await the completion of a Sussex North water neutrality strategy unless they can demonstrate water neutrality.

Summary
We have reviewed the Precautionary Method Statement for Mobile Protected Species (submitted 26th February 2025) and welcome the stated measures to protect reptiles, amphibians, nesting birds and small mammals.

We are still satisfied that there is sufficient ecological information available for determination. However, please note we have no comments on Great Crested Newt as we have been instructed to leave comments on this European Protected Species to the NatureSpace Partnership. This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.

This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.

We recommend that reasonable biodiversity enhancements for protected, Priority and threatened species should be identified and implemented to secure net gains for biodiversity, as outlined under Paragraph 187d and 193d of the National Planning Policy Framework (December 2024). The reasonable biodiversity enhancement measures should be outlined within a separate Biodiversity Enhancement Strategy and should be secured by a condition of any consent.

This will enable LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended) and delivery of mandatory Biodiversity Net Gain.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent.

Recommended conditions

1. **ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS**
   "All mitigation measures and/or works shall be carried out in accordance with the details contained in the Precautionary Method Statement for Mobile Protected Species (submitted 26th February 2025) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination.

   This may include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details."

   Reason*:* To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

2. **PRIOR TO ANY WORKS ABOVE SLAB LEVEL: BIODIVERSITY ENHANCEMENT STRATEGY**
   "Prior to any works above slab level, a Biodiversity Enhancement Strategy for protected and Priority or threatened species, prepared by a suitably qualified ecologist, shall be submitted to and approved in writing by the local planning authority.

   The content of the Biodiversity Enhancement Strategy shall include the following:

a) *Purpose and conservation objectives for the proposed enhancement measures;*
b) *detailed designs or product descriptions to achieve stated objectives;*
c) *locations of proposed enhancement measures by appropriate maps and plans (where relevant);*
d) *persons responsible for implementing the enhancement measures; and*
e) *details of initial aftercare and long-term maintenance (where relevant).*

The works shall be implemented in accordance with the approved details shall be retained in that manner thereafter."

Reason: To enhance protected, Priority and threatened species and allow the LPA to discharge its duties under paragraph 187d of the NPPF 2024 and s40 of the NERC Act 2006 (as amended).

Please contact us with any queries.

Yours sincerely
