# WEST SUSSEX COUNTY COUNCIL CONSULTATION

| | |
|---|---|
| **TO:** | Horsham District Council<br>FAO: Jacques Burrowes |
| **FROM:** | WSCC – Highways Authority |
| **DATE:** | 17 March 2025 |
| **LOCATION:** | Alexandra House<br>11 Queen Street<br>Horsham<br>West Sussex |
| **SUBJECT:** | DC/25/0215<br>Prior notification for change of use from office to residential to form three dwellings. |
| **DATE OF SITE VISIT:** | n/a |
| **RECOMMENDATION:** | Advice |

**This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals.**

I refer to your consultation in respect of the above planning application and would provide the following comments.

This proposal is for prior approval for change of use of to first and second floor to form 2 No 1-bed flats. The site is located on Queen Street, an A-classified road in Horsham Hurst subject to a speed restriction of 30 mph.

Under the current General Permitted Development Order (GPDO), it is permitted development to change use from Class E to residential (Class C3) subject first to prior approval being granted. As part of the prior approval process, there are a number of matters to be considered. This includes matters relating to highways and transport.

However, the GDPO is quite clear as to what highways matters can be considered, namely whether the proposal is likely to result in a material increase or material change in the character of traffic in the vicinity of the site.

No vehicular access is associated with this site. No traffic flow information has been provided with the current application; however, class E uses tend to generate greater material movements than C3 residential. Therefore, the LHA does not anticipate that material movements associated with the site will exceed that of the existing use.

WSCC Parking Standards would expect a development of this size and location to provide at least 6 car parking spaces. The applicant proposes a nil car parking provision - consequently, parking would have to be accommodated on-street.

Comprehensive parking restrictions are in place on nearby roads, prohibiting parking in places that would be detrimental to highway safety. The LHA does not anticipate that the existing nil car parking provision would result in a highway safety concern or parking capacity issue in this instance.

Due to the location of the development within a sustainable location in Horsham, it is not considered that occupants would be reliant on the use of a car. The LHA would request

that secure and covered cycle storage be provided if there is space within the site to do so.

In summary, the proposal is not anticipated to result in a material increase or change in the character of traffic. Consequently, no highway concerns would be raised. In principle, the current GPDO gives limited ability to consider wider highway and transport impacts beyond those set out. The prior approval is therefore considered acceptable in highway terms.
