Dear Sir

As a resident of Barns Green, I would like to raise the following objection to the proposed development of 68 properties in our village.

1. The small lanes running in and out of the village are already in a very poor state of repair and simply cannot cope with any more daily traffic
2. The children leaving the current primary school often have to go to secondary school many miles away as all the local schools are oversubscribed , this will only increase with potentially 68 further families.
3. Any time it rains the drains in all areas of the village are overflowing with water cascading from the surrounding fields on to the road , making driving and walking on the pathways hazardous.
4. The most recent development of houses remain mostly unsold , which undermines the theory of a need for housing.
5. The rural feel of the village that we all brought into when we purchased our houses is being eroded field by field , for the profit of developers rather than because of a need for houses for local people who are being priced out.
