It is my understanding that change of use from agricultural to residential use of land requires the land to have been used as residential for 10 years. In addition to my previous emails I attach an overview of the field from the Illustrative Master Plan 0015, REV G dated 03/03/2026 for Planning Application DC/26/0366. It clearly shows the agricultural field at Rowan with solar cells installed in 2022.

Yours truly
