Comments:	The key item that has been omitted from the current proposals is an on site set down/pick up area. Irrespective of how the College population grows in the future, this is already needed and the new development appears to be the perfect time to remedy this deficiency. Vehicular and pedestrian movements in Hurst Avenue are chaotic and dangerous each college day, particularly in the morning. Local residents, who witness this daily, are concerned that a serious accident will happen. It is disappointing that the College

does not wish to support the local community (who have to walk, drive or cycle through the dangerous melee) by providing a safer option.

Sadly it appears the WSCC highways representative has not been witness to this.

It is also rather surprising that Collyers does not prize the safety of its students highly enough to have already factored this in.

Nevermind about all the other concerns local residents will have regarding light, noise, loss of amenity etc. this one is probably a matter of life and death or injury.

I urge you to request a modification to the plans to provide a drive in and out set down/pick up area. Thank you.

Kind regards
