Dear Kate,

Good morning, I hope all is well.

I have tried to call you this morning a few times to discuss the attached development just to get a better idea of where we are.

Reason being is I am the new Manager for the Olive tree cancer support and we are a tenant of Age UK in Lavinia House.

I understand this planning was approved in October prior to my start.

I am wondering how we can go about putting in some objections aside from this letter which says it will only discuss points 9 and 17 of the approved application.

My query is the following having read the approved application notes:

- 1 – Where will my members park when building commences, is Dukes square going to be closed.
- 2 – Is the walkway next to drill hall going to be safe for people to walk up and into our offices
- 3 – With the reduced parking due to this application how are my members who are of the older age group going to reach us in cold/wet/icy conditions as the walkway up past drill hall is on a slant and my patients will not be able to get up that walkway.

I appreciate I am coming very late to the party, but I have just been informed of all this and I am very concerned about the wellbeing of our members with this build.

Thank you in advance for any help and information

Yours
