Categories: Consultations

Dear Alice,

Environmental Health have reviewed the above applicant and have the following comments to make regarding the most recently submitted Air Quality Assessment.

1. The mitigation remains unchanged and is still not acceptable, as each measure is already a requirement through various policies. Alternative schemes we would support include:
 - i. HDC Local Cycling and Walking Infrastructure Plan
 - ii. Improvements to existing cycling paths, and including cycle paths that meet up with current paths in the development design.
 - iii. Offsite provision of EV charging points to support the EV Charging Network and Delivery Plans for the local area.
 - iv. Support the delivery of WSCC Bus Service Improvement Plan
 - v. Other measures included in the Air Quality Action Plan and Annual Status Report
2. There are still no costs associated with the mitigation measures. The emission mitigation statement must contain itemised costing for each proposed mitigation option and total value of all proposed emissions' mitigation. This should be equal to the value from Emissions calculation and total calculated value of emissions' health damage cost.

Kind regards,

Isabelle Carter
