Subject: DC/26/0355 - Land To The Rear of The Copse

Hi Kate,

Apologies for the delay in providing comments on this application.

1. EH have reviewed the Air Source Heat Pump Location Plan and it would appear that some of the ASHP units are located close together. For these areas we therefore have some concerns in relation to the cumulative impact of these units, both in terms of proposed units and offsite receptors.
2. We also note that a revised proposed site layout has been provided (uploaded onto the planning portal on 23.06.26), it therefore not clear if the above mentioned air source heat pump location plan is still accurate.
3. In our comments dated 16.04.26 we also requested that a revised preliminary contamination risk assessment be provided, it is however not clear if this has been provided.

Kind regards

Kevin
