Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	An extension proposed by my neighbour will be built along my boundary . This borders a 3 foot passage giving me access front to back . It will be used for a major part of dismantling a single storey flat roof and an apex garage roof together with any necessary brick work .An extension the full height of the house will then be built , again using my passage for a major part of the work . 1 For some months this will be a major nuisance immediately adjacent to my living room wall . 2 It will block my access , front to back with builders , scaffolding etc

3 Any dust , fumes created will be drawn in by my central heating and hot water air intake .
4 It will significantly block a window half way up my stairs which provides very useful light in this area .
5 The space for delivery / removal of building materials is very limited at the end of a close where 4 drives come out together .
6 I do not intend to give permission for access to builders from my property 8 Reapers Close .

Kind regards
