Customer Details

Address: Grenfell Newhouse Lane Storrington Pulborough West Sussex

Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Highway Access and Parking - Privacy Light and Noise - Trees and Landscaping
Comments:	LIGHT The proposed west elevation of the new build would over shadow and reduce natural light to three existing windows on the east side of the property Grenfell. Currently natural light is unimpeded through these windows.

PRIVACY

Grenfell currently enjoys complete privacy and it's garden is not overlooked. However the new build, which is double storey, will overlook the whole of Grenfell's garden.

There appears to be a door from the new build's utility room lying on it's west elevation which would impact on Grenfell's privacy.

NOISE

A new build within close proximity of Grenfell will obviously generate more noise.

DESIGN

All residential properties within Newhouse Lane (classified as rural) currently benefit from a greater distance between neighbouring properties, the new build alters this and therefore the character of the lane is altered.

HIGHWAY ACCESS AND PARKING

Newhouse Lane is a single carriageway without street lights and additional traffic will inevitably increase safety concerns.

TREES AND LANDSCAPING

Currently there are several mature trees and hedging on Bramblewood's land bordering Grenfell but none of these benefit from Tree Preservation Orders. Is there a guarantee that these trees and hedging will remain during rebuild and thereafter?

Kind regards
