

Hi Shazia,

I have reviewed the comment about the lighting. What is referred is clearly guidance. I remind the authority that the principle of development was already confirmed through the permission and that there are competing demands associated with delivering enough light to ensure that the area is safe for staff and visitors. The site forms part of a business park it is not within an area designated for 'dark night skies' with the request being somewhat excessive. Having said that we want to get this over the line ASAP and so I have changed the lighting, please see the attached.

Please can you confirm when the decision could be issued?

Kind regards,

Alex
