

HERITAGE STATEMENT - ref PP-14098431.

Chapel Cottage, Nuthurst street, Nuthurst, RH13 6RG is a grade 2 listed building as per listing number 1194111.

The cottage itself is circa 17c and is situated on the border between Nuthurst and Maplehurst.

The garage for the cottage, where the solar installation is proposed, is a modern structure set back from the main building.

The proposed installation of the solar panels to the south facing side of the garage roof would not be visible from a public point of view and would be visually subordinate to the main building.

Should the solar panels, at any time in the future, need to be removed from the roof there would be no damage to the existing roof.

I do not believe this solar installation would harm the character, appearance or setting of this listed building or of the wider conservation area.
