

Alligator Bagtank®

Need storage for fluids up to 7000m³? No problem! Our Bagtank offers you flexible storage for siting on any surface.

The Alligator Bagtank is made from a polyester fabric with a high-grade plastic coating applied to both sides. This is resistant to many kinds of fluid and the effects of UV radiation. This guarantees a long service life.

DESIGN AND IMPLEMENTATION

The Alligator Bagtank is supplied in a square or rectangular shape and, depending on the highest groundwater level, it can be installed partly below surface level.

As a standard, the Alligator Bagtank features
- suction/filler pipe
- valves
- spillage container
- air vents
- closable inspection opening

If required, mixing equipment can be supplied along with the Bagtank. Various systems are available for this. Both the design and manufacture are carried out by our dedicated and skilled workforce at Albers Alligator. This enables us to react to the requirements of any project quickly and efficiently.

STRONG AND THEREFORE SAFE

The mechanical forces that arise during the use of the Alligator Bagtank are taken up straightforwardly by the strong fabric. Based on strength calculations, the primary components such as material, welded seams and fixing points are dimensioned with very generous safety margins. The Alligator Bagtank is certified by KIWA.

ALWAYS AN EXPERT CLOSE BY

Albers Alligator delivers its products both nationally and internationally. Local dealer networks are used to make this possible. This means that there is always an expert nearby. The Bagtank is used in a large number of markets, such as industry, civil engineering and agriculture.

Through flexible anchorage, it is in the right position at every liquid level.

The Alligator Bagtank is suitable for industrial applications.

STRICT REQUIREMENTS ENSURE GOOD QUALITY

The supply of high-quality products is always top priority at Albers Alligator. The plastics that Albers Alligator uses comply with the strictest requirements; they are continually tested and processed using the most modern methods.

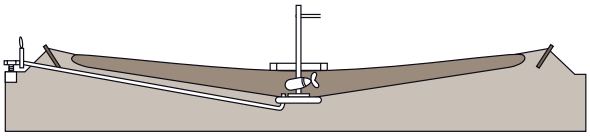

Through the use of specially-designed machinery, Albers Alligator is always able to produce top-quality welded seams. The quality of these welded seams determine the quality of the end-product and they have proved themselves for over 30 years. A guarantee is provided on all Albers Alligator products. The length of the guarantee depends on the medium, the use and the conditions.

ADVANTAGES OF THE ALLIGATOR BAGTANK

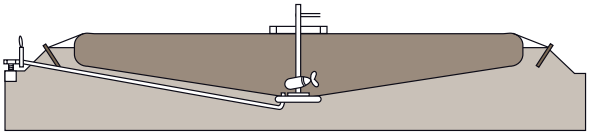

- **No expensive foundation structure needed**
- **Inherently suitable for a weak subsoil**
- **Forms upper and lower seal simultaneously**
- **Minimal impact on the surrounding landscape**
- **Sloped sides for easy emptying**
- **The Alligator Bagtank offers you a flexible and affordable storage system**
