Subject: Regarding ref DC/26/0926

Dear Sir/ Madem ,

Following a recent inspection, it is my professional opinion that the Larch tree in question has now died and is no longer capable of recovery. The tree shows no signs of viable growth and has reached a condition whereby retention is neither practicable nor appropriate.

Given the tree's current condition, its amenity value has been lost and, in accordance with sound arboricultural practice, I recommend that it be removed in its entirety.

To support this assessment, a photograph of the tree taken in June this year has been attached to this application. The photograph clearly illustrates the tree's present condition and confirms the extent of its decline and subsequent death.

Accordingly, consent is sought for the removal of the dead Larch tree.

Many thanks

Edward Wright (The Tree Men)
