By email only: Planning Department, planning@horsham.gov.uk

Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Horsham District Council planning decisions with regard to potential ecological impacts from development.

Application: DC/26/0322
Location: Steyning Grammar Upper School Shooting Field Steyning West Sussex BN44 3RX
Proposal: Part-demolition of existing teaching buildings, MUGAs and all-weather pitch. Construction of replacement 2-storey and 3-storey teaching buildings, flood-lit all-weather pitch and hard surfaced sports courts, with associated access, parking, landscaping and infrastructure.

Thank you for re-consulting Place Services on the above application.

Summary

We have reviewed the Construction Ecological Management Plan (MKA Ecology, May 2026) and support the implementation of this document. Please note that comments on Biodiversity Net Gain are provided by Horsham District Council in-house.

We are still satisfied that there is sufficient ecological information available for determination of this application.

We still have no objections on ecological matters excluding Great Crested Newt as we have been instructed to leave comments on this European Protected Species to the [NatureSpace Partnership](#).

For clarity, we have included the conditions recommended in our response dated 7th April 2026, updated to include the CEMP in the compliance condition.

As previously advised, impacts will be minimised such that the proposal is acceptable subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent:

Recommended conditions

1. ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS

“All mitigation measures and/or works shall be carried out in accordance with the details contained in the Construction Ecological Management Plan (MKA Ecology, May 2026), Ground Level Tree Assessment (MKA Ecology Ltd., February 2026), Preliminary Ecological Appraisal Technical Summary Note (MKA Ecology Ltd., December 2025), Bat Presence and Absence Surveys (Brindle & Green Ltd, October 2025) and Preliminary Ecological Appraisal (Geosphere Environmental, January 2023), as already submitted with the planning application and agreed in principle with the local planning authority prior to determination.

This may include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details.”

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

2. PRIOR TO COMMENCEMENT: A PRECAUTIONARY METHOD STATEMENT FOR REPTILES AND MOBILE PROTECTED AND PRIORITY SPECIES

“A Precautionary Method Statement for reptiles and mobile protected and Priority species shall be submitted to and approved in writing by the local planning authority. This will contain precautionary mitigation measures and/or works to reduce potential impacts to reptiles and mobile protected and Priority species during the construction phase.

The measures and/works shall be carried out strictly in accordance with the approved details and shall be retained in that manner thereafter.”

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

3. **PRIOR TO ANY WORKS ABOVE SLAB LEVEL: BIODIVERSITY ENHANCEMENT STRATEGY**

“Prior to any works above slab level, a Biodiversity Enhancement Strategy for protected and Priority or threatened species, prepared by a suitably qualified ecologist, shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Enhancement Strategy shall include the following:

- a) Purpose and conservation objectives for the proposed enhancement measures;*
- b) detailed designs or product descriptions to achieve stated objectives;*
- c) locations of proposed enhancement measures by appropriate maps and plans (where relevant);*
- d) persons responsible for implementing the enhancement measures; and*
- e) details of initial aftercare and long-term maintenance (where relevant).*

The works shall be implemented in accordance with the approved details shall be retained in that manner thereafter.”

Reason: To enhance protected and Priority species & habitats and allow the LPA to discharge its duties under paragraph 187d of NPPF 2024 and s40 of the NERC Act 2006 (as amended).

4. **PRIOR TO BENEFICIAL USE: WILDLIFE SENSITIVE LIGHTING DESIGN SCHEME**

“Prior to occupation, a “lighting design strategy for biodiversity in accordance with Guidance Note 08/23 (Institute of Lighting Professionals) shall be submitted to and approved in writing by the local planning authority. The strategy shall:

- a) identify those areas/features on site that are particularly sensitive for bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example, for foraging; and*
- b) show how and where external lighting will be installed so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.*

All external lighting shall be installed in accordance with the specifications and locations set out in the scheme and maintained thereafter in accordance with the scheme. Under no circumstances should any other external lighting be installed without prior consent from the local planning authority.”

Reason: To allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside

Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended) and Policy 31 of the Horsham Development Framework.

Please do not hesitate to contact us if you have any queries in relation to this advice.
