Supporting Statement for Fence Relocation Request

I am submitting this request to relocate my existing fence to enclose the adjacent verge within my garden perimeter. The primary reasons for this request are to enhance storage capacity and provide a safer, more spacious area for my children to play.

Currently, the available garden space is limited, restricting both outdoor activities and storage options. Enclosing the verge would allow for a more practical and organized use of the property, ensuring that essential storage items are securely placed while also creating a dedicated and secure area for my children to play safely away from roads or public pathways.

I understand the importance of maintaining the aesthetic and functional integrity of the surrounding area and am committed to ensuring that any modifications align with local regulations and community considerations. The proposed fence relocation will be carried out in a manner that respects the existing landscape while improving the overall usability of my property.

I appreciate your consideration of this request and welcome any further discussions or site visits if needed.

Many thanks,

Aden Winser
