FAO: HDC Planning / Matthew Porter

Ref: DC/26/0366

I am a resident of Tower Hill, Horsham. Myself and many other residents are concerned about the impact of this development on traffic levels on our road.

With this in mind I have a simple proposal:

Please modify Berkeley's plan for a new Light Industrial access road & join it directly to Christs Hospital Road. [taken from the document "DESIGN AND ACCESS STATEMENT PART 3 OF 6" on the portal] - see green dotted line.

See attached diagram

This would accomplish the following goals:

- Prevent Berkeley's new residential streets from becoming a rat-run for traffic to Christs Hospital School and Bluecoats Sports.
- Create a better road link to CH station for buses.
- Provide much better access for local residents and outlying villages
- Provide a faster route for emergency vehicles to Christs Hospital and beyond
- Alleviate traffic problems on Tower Hill, Two Mile Ash Road and roads to the south into Southwater.

Please consider this proposal - this link could be a simple way to address many, many stakeholder's concerns.

Kind regards,

Character Area 2: The Northern Woodland – Illustrative Plan

The illustrative plan highlights the glades, routes, and development how the Northern Woodland can be walkable, and landscape-led transport and its wider setting.

Legend

- Site boundary
- 1 Existing hedges or woodland, to remain
- 2 Species-rich wildflower planting
- 3 SuDS Basin
- 4 Wetlands Meadow
