Hello,

Please see the site map that Will Jones completed 5 years ago. the TPO is 1535.

The common lime tree is T60 on this plan

The Hazel tree is T64 and the two cornelian cherry trees are T65 & T66.

The plan shows the directional facing. I will take a couple of photos and send to you. I have asked the tree surgeon who has looked after all our trees for over 25 years to give me some measurements which I will get to you asap.

Regards

Maureen Miller
