This architectural drawing shows a house with a half-timbered upper floor and a modern extension. The house features a steep gable roof with a chimney on the left. The upper floor is characterized by a grid of timber framing. A small green window is visible on the upper floor. The modern extension on the right has a flat roof and a large, dark, textured wall. The drawing uses a color-coded system: red for the main structure, green for the timber framing, and blue for the modern extension.

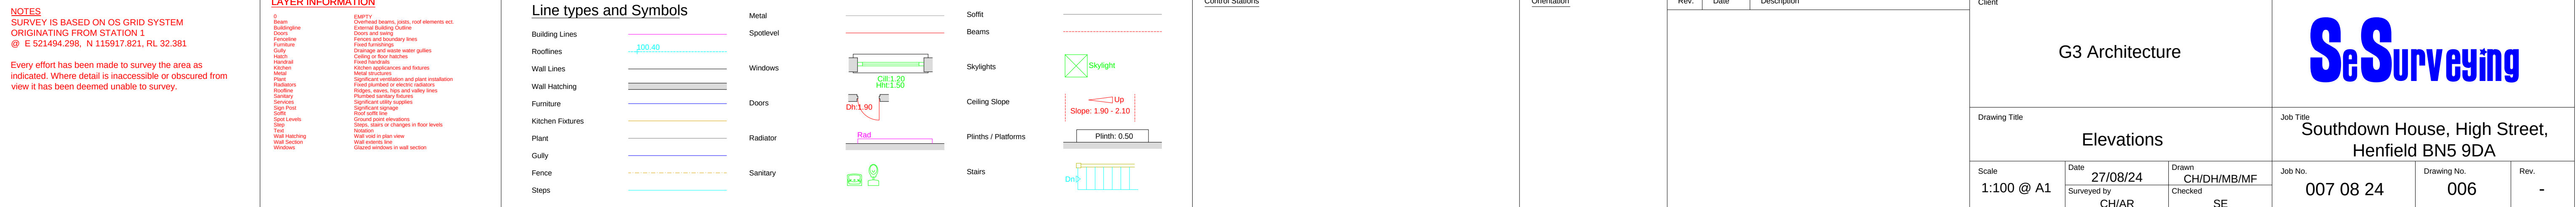

The diagram shows a building facade with a green window and a yellow door. Above the facade is a cross-section of a roof with a blue sky and a red sun.
