Bat House Chamber Wooden Waterproof Windproof Bat Box Shelter

Specification:

Item Type: Bat House

Material: Composite wood

Weight: Approx. 400g/14.1oz

Product Size: Approx. 14.5x22.7x9cm/5.7x8.9x3.5in

Feature:

1. Handcrafted and Weather Resistant: This bat house is meticulously handcrafted and coated with weather resistant materials, capable of withstanding various weather conditions, including snow, rain, cold, and heat.
2. Double Chamber Design: This bat house offers ample space for a whole colony to roost, featuring grooves inside for them to hang, suitable for outdoor garden, patio, yard, etc.
3. Eco Friendly Solution: Bats play a vital role in the natural ecosystem, and a bat house provides them with a shelter in environmentally beneficial areas.
4. No Need to Attract Bats to Your House: If you install the house in a high location, away from potential predators, bats will naturally find their way to it. They instinctively search for new roosting spots every night. PTO
