Dear Maria,

I hope you had a wonderful weekend.

I am emailing in regards to the next step once you have received your District License certificate from NatureSpace. The District License is designed to run alongside the planning system; having read your planning permission decision notice I can see that there are no specific planning conditions for us to attach our license conditions to, to be able to discharge them. I understand that they have asked for an EWoC on site during the works and suggest that this be changed to the regulatory condition for a license for great crested newts instead, which you can discharge by using your NatureSpace District License certificate.

Having spoken to our District License Officer for the county and your Planning Officer, we suggest you apply for a Non-Material Amendment (NMA) to your planning by filling out an NMA form on the planning portal to make this change. You will need to wait for your District License certificate to attach to your application form, however as Tom mentioned previously, you will receive your certificate no later than the 21*st* March.

Please let me know if I can be of any further help.

With kind regards,

Maya Master
Assistant Technical Officer
