Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Other
Comments:	Public safety must always remain the top priority when considering any application to be erected in a busy Horsham street. It is potentially dangerous with a very high risk to health and safety for both public and motorists alike, by the placement of these 2 street advertising hubs in the proposed location(s) in the Bishopric.

These large 3 metre 2 way digital screens are purposely designed with expert execution to capture and hold ones 'Attention' changing its absorbing content every 10 seconds to maintain the observers stimulated interest.

Such vivid digital imagery located next to a very busy main road, will have the ensured desired hypnotic effect upon oncoming motorists comprising safety, by causing distraction and impeding their concentrated focus whilst driving!

This will of cause without doubt will be dangerous, vastly increasing the probability that accidents will occur, with possible dire consequences of serious injuries or even loss of life...

I totally oppose this application.

Kind regards
