[redacted] [redacted]

Hi there

Please see additional details below, which you have requested to validate application DC/25/0996

T1 (Oak) - Canopy height & spread before requested works = approximately 13 metres (work requested to reduce canopy by 15%) this will remove approximately 1.95 metres from overall canopy radius.

T2 (Oak) - Canopy height & spread before requested works = approximately 17 metres (work requested to reduce canopy by 15%) this will remove approximately 2.55 metres from overall canopy radius.

Please let me know if there is anything else you need.

Kindest regards

Will Tarbet
